## AND THEIR SOLUTIONS

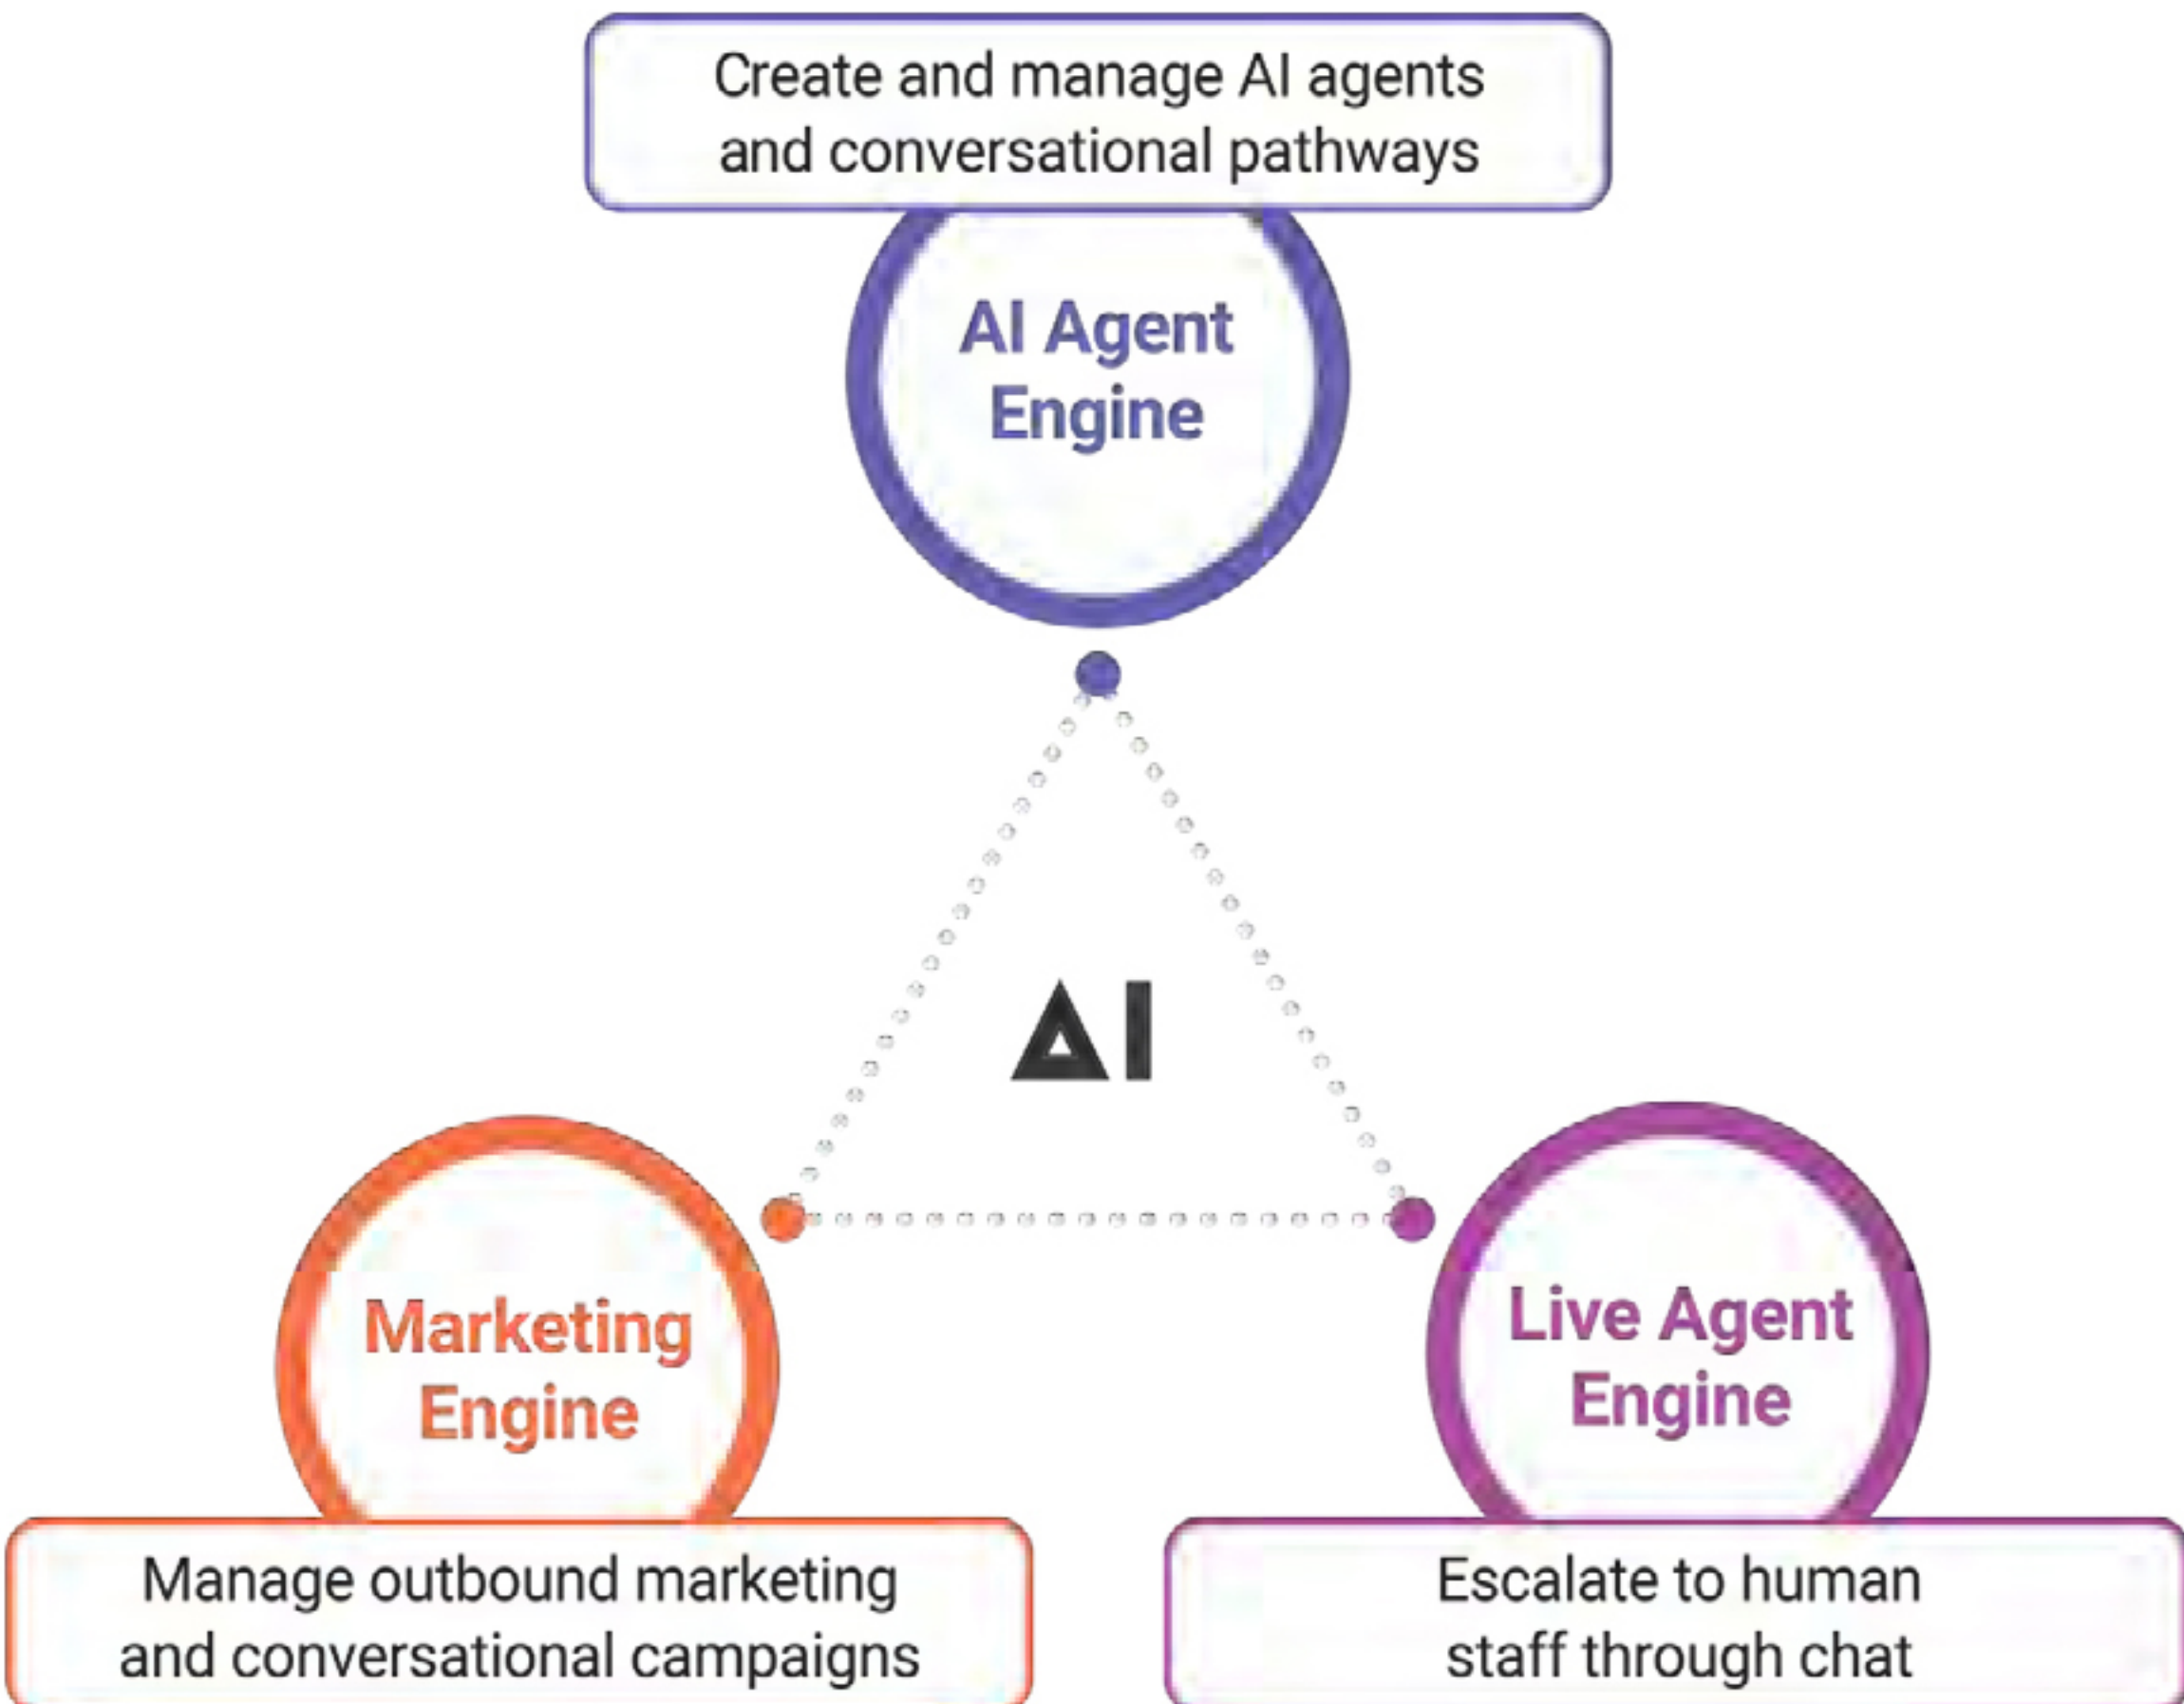

### Unify Conversational Experiences On One Platform

Satisfi Labs' conversational experience platform is built to prioritize relationship-building with customers through connected outbound campaigns and inbound AI chat experiences.

We connect marketing, guest experience and sales through intelligent journey management and data unification, turning every interaction into an opportunity to build lasting customer relationships and drive repeat engagement.

### The Three-Engine Ecosystem

- **AI Agent Engine:** Build and deploy AI agents that autonomously manage customer conversations, delivering personalized support and driving actions across multiple channels.
- **Marketing Engine:** An all-in-one marketing automation platform that simplifies outbound campaigns, managing email, SMS, WhatsApp, and more in a seamless workflow for enhanced customer outreach.
- **Live Chat Engine:** An advanced live chat solution that bridges AI and human support, allowing seamless escalation to live agents when needed.
