

MAJOR ATTRACTIONS

Engineering Emotions

We exist to design technologically enriched experiences that trigger an unstoppable chain of emotions in seconds.

CHAIN OF EMOTIONS[®]

GET AMAZED

The adventure kicks off with a surprise! A sudden, unexpected stimulus grabs attention—whether it's a thrilling motion, an unexpected twist, or a jaw-dropping effect. From the very first moment, excitement starts to build.

GET EXCITED

The brain kicks into high gear, processing what just happened while anticipating what's coming next. That initial surprise turns into pure excitement, making every second feel electric.

GET CURIOUS

Now the thrill really sets in. What's next? What's around the corner? The anticipation keeps building, keeping everyone on the edge of their seat, eager for the next twist.

GET AMUSED

The body reacts—heart pounding, muscles tensing, adrenaline rushing! Every thrilling moment creates a wave of fun and laughter, amplifying the ride's excitement.

GET SATISFIED

The journey ends on a high note. After all the thrills, surprises, and excitement, visitors step off feeling exhilarated, fulfilled, and ready to go again!

we share

YOUR

DREAM

Enriching the visitor experience in amusement attractions has always been the top priority. As visitors are in the pursuit of seeking more and more exciting experiences, using the power of emotions is key to generate unforgettable memories.

We leverage our technological capability with creative storytelling to evoke the emotions of our visitors and constantly change their feelings. That's why we exist to design technologically enriched, story based experiences that trigger an unstoppable chain of emotions in digital life.

ABOUT US

We challenge the status quo by combining creative storytelling with advanced technology, to engineer unforgettable experiences from 2006 to today.

60+ Countries 500+ Projects

Since its foundation, DOF Robotics has been transforming the amusement industry with high-tech products and groundbreaking edutainment projects. Our “story-based” attractions have delivered unforgettable experiences worldwide and soon, we’ll take a leap into “story-living” with surreal, AI-powered adventures, like letting guests explore life on Mars.

DOF Robotics is a world-leading brand in robotic systems, amusement and entertainment technologies, immersive education, motion simulators, customized motion platforms, special effects, game and content development, and image interpretation software technologies.

Every day, we strive to create unique, high-performance attractions that energize venues and keep guests coming back. With numerous patented technologies and international awards, including IAAPA Brass Ring Awards—we’re proud to lead the industry in innovation.

Our rides combine smooth motion, precise synchronization, and advanced engineering to ensure top performance without motion sickness. Today, DOF attractions operate in over 60 countries, enjoyed by millions visitors.

OUR TEAM

We are a dynamic and determined team, blending expertise with passion, with the utmost focus on innovation. We integrate technology with imagination and bring it to life with flexible, customized production capabilities and an international reach.

Your ultimate solution for thrilling cinema experience, an immersion like guests have never felt before. Engaging, scalable and cost-efficient, the right investment to increase footprint and earn more from your venues.

Our largest XD Theaters up to this date can accommodate over 150 seats. This multi-platform solution utilizes 6 Degrees of Freedom (DOF) motion simulators, with up to 32 units per installation. DOF Robotics' XD Theater can be equipped with high-quality flat, curved, or dome screens, tailored to the customer's preferences and spatial constraints. The simulator motion is precisely synchronized with the on-screen content, ensuring a seamless and immersive experience for the audience—free from interruptions.
